

ROGOZ AUDIO ANTI-VIBRATION AUDIO STAND

3-level, four-legged stand with glossy piano finish shelves (natural tinea-indian apple veneer). The top shelf is optimal for analog gramophones and digital signal sources.

The frame contains quartz sand ballast (bolted holes in the legs make it possible to change the amount and kind of ballast). The frame color: piano black (glossy).

Anti-vibration stands are designed for high end audio components. The frame has been tuned by a suitable combination of alloy steel and high-fiber content steel. The frame consists of extra-strong legs made of carbon steel S235JR (which is used for load-bearing structures subject to heavy dynamic load, e.g. in cranes) connected by crosspieces made from higher-strength alloy steel S355. Adjustable anti-vibration spikes are used for high-precision leveling.

TECHNICAL DESCRIPTION

- Overall height: 824 mm
- Overall width: 665 mm
- Overall depth: 590 mm
- Leg profile: steel pipes (\varnothing 76.1 mm – front, \varnothing 60 mm – back)
- Top shelf: 665 x 590 x 50 mm
- Center and bottom shelves: 500 x 530 x 40 mm
- Usable distance between the shelves (moving upwards): 307, 207 mm
- Maximum load for each shelf: up to 150 kg (total: 450 kg)
- Ballast: quartz sand

A COMPLETE SET INCLUDES:

- 1 steel frame
- 3 shelves
- 16 height-adjustable spikes
- 4 massive anti-scratch disks protecting the floor
