

ROGOZ AUDIO ANTI-VIBRATION AUDIO STAND

2-level, four-legged stand, with shelves covered in natural wood veneer (walnut). The top shelf is optimal for analog gramophones and digital signal sources.

The frame contains quartz sand ballast (bolted holes in the legs make it possible to change the amount and kind of ballast). The frame color: black (matt, fine grain).

Anti-vibration stands are designed for high end audio components. The frame has been tuned by a suitable combination of alloy steel and high-fiber content steel. The frame consist of extra-strong legs made of carbon steel S235JR (which is used for load-bearing stuctures subject to heavy dynamic load, e.g. in cranes) connected by crosspieces made from higher-strength alloy steel S355. Adjustable anti-vibration spikes are used for for high-precision leveling.

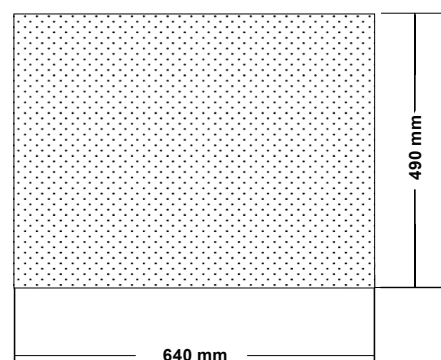

TECHNICAL DESCRIPTION

- Overall height: 580 mm
- Overall width: 640 mm
- Overall depth: 490 mm
- Leg profile: steel pipes (80 mm – front, 60 mm – back)
- Top shelf: 640 x 490 x 50 mm
- Bottom shelves: 470 x 430 x 40 mm
- Usable distance between the shelves: 390 mm
- Maximum load for each shelf: up to 150 kg (total: 300 kg)
- Ballast: quartz sand

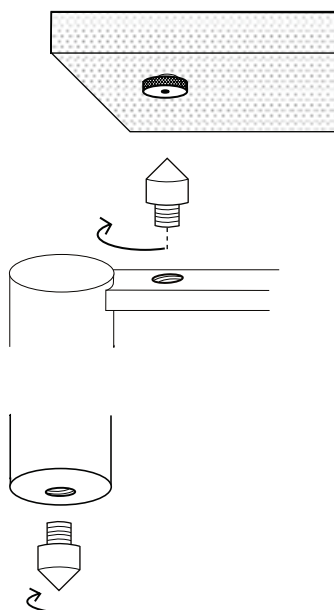

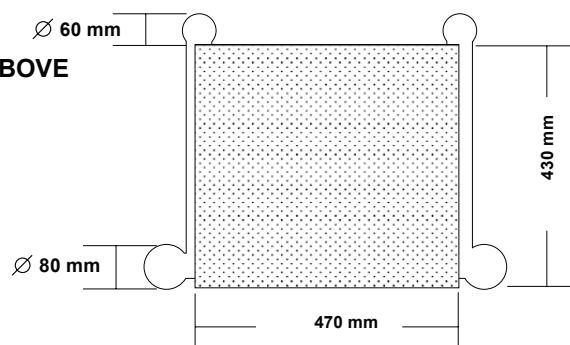

A COMPLETE SET INCLUDES:

- 1 steel frame
- 2 shelves (plywood, MDF, and wood veneer)
- 12 height-adjustable spikes
- 8 anti-vibration separating disks
- 4 massive anti-scratch disks protecting the floor
