

ROGOZ AUDIO ANTI-VIBRATION AUDIO STAND

3-level, four-legged stand with 30 mm thick shelves covered in natural wood veneer (dark mahogany – color no. 2608). The frame color: piano black (glossy).

Anti-vibration stands are designed for high end audio components. The frame has been tuned by a suitable combination of alloy steel and high-fiber content steel. The frame consist of extra-strong legs made of carbon steel S235JR (which is used for load-bearing stuctures subject to heavy dynamic load, e.g. in cranes) connected by crosspieces made from higher-strength alloy steel S355. Adjustable anti-vibration spikes are used for for high-precision leveling.

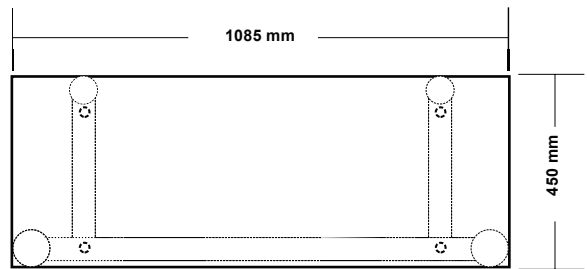

TECHNICAL DESCRIPTION

- Overall height: 770 mm
- Overall width: 1085 mm
- Overall depth: 450 mm
- Leg profile: steel pipes (∅ 80 mm – front, ∅ 60 mm – back)
- Top shelf: 1085 x 450 x 30 mm
- Center and bottom shelves: 920 x 390 x 30 mm
- Usable distance between the shelves (moving upwards): 280, 220 mm
- Maximum load for each shelf: up to 150 kg (total: 450 kg)

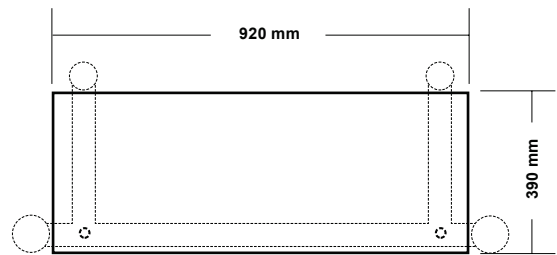

A COMPLETE SET INCLUDES:

- 1 steel frame
- 3 shelves (MDF and wood veneer)
- 16 height-adjustable spikes
- 12 anti-vibration pads
- 4 massive anti-scratch disks protecting the floor
